DETAILED ACTION

Claims 15-26 are pending in the application.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 22 and 23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In evaluating the enablement question, several factors are to be considered. In re Wands, 8 USPQ2d 1400 (Fed. Cir. 1988); Ex parte Forman, 230 USPQ 546. The factors include: 1) The nature of the invention, 2) the state of the prior art, 3) the predictability or lack thereof in the art, 4) the amount of direction or guidance present, 5) the presence or absence of working examples, 6) the breadth of the claims, and 7) the quantity of experimentation needed.

The nature of the invention in the instant case has claims, which embrace substituted 2,3-benzodiazepines.

HOW TO USE: Claims 22 and 23 are a composition and method of use of the compounds of formula I where the method is a method of treating a patient suffering from central nervous system disorders, which is responsive to AMPA. Any evidence presented must be commensurate in scope with the claims and must clearly

demonstrate the effectiveness of the claimed compounds. However, the specification provides no definitive evidence to correlate any one disorder selected from those disclosed in the specification with the instantly disclosed 2,3-benzodiazepine compounds. No screening protocols are ever described. Thus, no evidence of in vitro effectiveness is seen in the specification for one of the instantly claimed 2,3-benzodiazepine compounds. In general, pharmacological activity is a very unpredictable area. In cases involving physiological activity "the scope of the enablement obviously varies inversely with the degree of unpredictability of the factors involved." In re Fisher, 427 F.2d 833, 166 USPQ 18 (CCPA 1970). Since this case involves unpredictable in-vivo physiological activities, the scope of the enablement given in the disclosure presented here was found to be low. The specification does not have working examples on the use of the substituted 2,3-benzodiazepines. The absence of working examples is one of the factors to be considered in deciding whether the practice of an invention would involve undue experimentation.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 15-19, 21-24 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reasons apply:
 - a. Claims 15, 18, 21, 24, 26 and claims dependent thereon are vague and indefinite in that it is not known what is meant by "formula-NH-R¹".

- b. Claims 15, 24, 26 and claims dependent thereon are vague and indefinite in that it is not known what is meant by the parenthesis that appears at the end of the definition of R¹ where there is no open parenthesis.
- c. Claim 18 is vague and indefinite in that it is dependent on a canceled claim.
- d. Claim 26 is vague and indefinite in that it is not known what is meant by R¹ which is not defined within the claim.

Claim Objections

- 3. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Allowable Subject Matter

- 4. Claim 25 is allowed. None of the prior art of record or a search in the pertinent art area teaches the compounds of formula (VIII) as claimed herein.
